

Pedagogical use of Chats and other tools in classroom

Daniel Eisenmenger
Teaching French & History
Eichendorff-Gymnasium Koblenz
Regional eTwinning ambassador

First online chat

Talk about your expectations and/or experiences:

A chat-room is included in every twinspace.

Main problems:

Structure

Different types of chat

- partner-chat (one to one)
- expert-chat (one to many)
- class-chat (many to many)

Organising an online chat

- Clear topic & rules
- Enough time: min. 3 lessons
- Enabling technology:
computers, internet access, if needed: projector
- For expert-chats:
Few active users, the others students
observe & take notes

Use in an eTwinning project

- Ice-breaker
- Get to know each other
- Organising group work
- Presenting results
- Discussing controversial topics
- Special tasks

Running an online chat

- A question of time:
 - Synchronous event
 - At least one lesson

Try out in the IT-room

- Get the mobile phone number of your colleague
- Have an alternative lesson in store

Follow up

- Discuss & evaluate
 - the event
 - the results
- Clarify all questions left
- If possible: providing a record of the chat

Second online chat

Prepare your questions and
we will have an online-chat.

Any questions?

Videoconferencing

Tele-/ Videoconferencing - Tools

Types

- 1) VoIP: Voice calls over the Internet
- 2) Video conferencing
- 3) Web conferencing

Flashmeeting

FlashMeeting – a safe tool available for free for eTwinning projects!

Any questions²?

The background is a blue gradient that transitions from a lighter blue on the left to a darker blue on the right. A thin white arc starts from the left edge and curves downwards towards the bottom right corner.

Thank you!
